

DRY-AGED PRIME RIB

APRIL 23-27

During the dry-aging process, moisture is drawn out of the beef, intensifying its natural flavor and making the meat even more tender.

At 45 days, the meat is known to have a buttery, slightly nutty taste. The time-consuming and delicate art of dry-aging beef relies on precise humidity, temperature and air circulation.

Enjoy this delicious twist on our classic prime rib.

DRY-AGED PRIME RIB

Includes choice of two sides:
creamed spinach, creamed corn, mashed potatoes
